Anonymous financial contact:

The UCC-1 filing that you posted is related to this matter however, The executive order specifically mentioning publicly that we are Human Capital was Executive Order No. 13037 March 4, 1997 (specifically section 2 subsection (b)). Prior to this the registrations of birth was secretly used in order to create a 'Bond' or debt on each individual. This has been taking place since 1933 in private.
mentary Agreement). The Second Supplementary Agreement, signed at Ottawa on May 28, 1996, is intended to modify certain provisions of the original United States-Canada Social Security Agreement signed at Ottawa March 11, 1981, which was amended once before by the Supplementary Agreement of May 10, 1983.

The United States-Canada Social Security Agreement is similar in objective to the social security agreements with Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, The Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom. Such bilateral agreements provide for limited coordination between the U.S. and foreign social security systems to eliminate dual social security coverage and taxation, and to help prevent the loss of benefit protection that can occur when workers divide their careers between two countries.

The Second Supplementary Agreement provides Canada with a specific basis to enter into a mutual assistance arrangement with the United States. This enables each Government's Social Security agency to assist the other in enhancing the administration of their respective foreign benefits programs. The Social Security Administration has benefited from a similar mutual assistance arrangement with the United Kingdom. The Second Supplementary Agreement will also make a number of minor revisions in the Agreement to take into account other changes in U.S. and Canadian law that have occurred in recent years.

The United States-Canada Social Security Agreement, as amended, would continue to contain all provisions mandated by section 233 and other provisions that I deem appropriate to carry out the provisions of section 233, pursuant to section 233(c)(4) of the Act. I also transmit for the information of the Congress a report prepared by the Social Security Administration explaining the key points of the Second Supplementary Agreement, along with a paragraph-by-paragraph explanation of the effect of the amendments on the Agreement. Annexed to this report is the report required by section 233(e)(1) of the Act on the effect of the Agreement, as amended, on income and expenditures of the U.S. Social Security program and the number of individuals affected by the amended Agreement. The Department of State and the Social Security Administration have recommended the Second Supplementary Agreement and related documents to me.

I commend the United States-Canada Second Supplementary Social Security Agreement and related documents.

William J. Clinton

Executive Order 13037—Commission To Study Capital Budgeting

March 3, 1997

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

Section 1. Establishment. There is established the Commission to Study Capital Budgeting ("Commission"). The Commission shall be bipartisan and shall be composed of 11 members appointed by the President. The members of the Commission shall be chosen from among individuals with expertise in public and private finance, government officials, and leaders in the labor and business communities. The President shall designate two co-chairs from among the members of the Commission.

Sec. 2. Functions. The Commission shall report on the following:

(a) Capital budgeting practices in other countries, in State and local governments in this country, and in the private sector; the differences and similarities in their capital budgeting concepts and processes; and the pertinence of their capital budgeting practices for budget decisionmaking and accounting for actual budget outcomes by the Federal Government;

(b) The appropriate definition of capital for Federal budgeting, including: use of capital for the Federal Government itself or the economy at large; owner-
ship by the Federal Government or some other entity; defense and non-defense capital; physical capital and intangible or human capital; distinctions among investments in and for current, future, and retired workers; distinctions between capital to increase productivity and capital to enhance the quality of life; and existing definitions of capital for budgeting;

(c) The role of depreciation in capital budgeting, and the concept and measurement of depreciation for purposes of a Federal capital budget; and

(d) The effect of a Federal capital budget on budgetary choices between capital and noncapital means of achieving public objectives; implications for macroeconomic stability; and potential mechanisms for budgetary discipline.

Sec. 3. Report. The Commission shall adopt its report through majority vote of its full membership. The Commission shall report to the National Economic Council by March 15, 1998, or within 1 year from its first meeting.

Sec 4. Administration. (a) Members of the Commission shall serve without compensation for their work on the Commission. While engaged in the work of the Commission, members appointed from among private citizens of the United States may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law for persons serving intermittently in the Government service (5 U.S.C. 5701-5707).

(b) The Department of the Treasury shall provide the Commission with funding and administrative support. The Commission may have a paid staff, including detailers from Federal agencies. The Secretary of the Treasury shall perform the functions of the President under the Federal Advisory Committee Act, as amended (5 U.S.C. App.), except that of reporting to the Congress, in accordance with the guidelines and procedures established by the Administrator of General Services.

Sec. 5. General Provisions. The Commission shall terminate 30 days after submitting its report.

William J. Clinton

NOTE: This Executive order was released by the Office of the Press Secretary on March 4, and it was published in the Federal Register on March 6.

Remarks Announcing the Prohibition on Federal Funding for Cloning of Human Beings and an Exchange With Reporters
March 4, 1997

The President. Good morning. I’m glad to be joined this morning by the Vice President, Secretary Shalala, Dr. Harold Varmus, the head of NIH; Dr. Harold Shapiro, the president of Princeton and the Chairman of our Bioethics Advisory Commission; and Dr. Jack Gibbons, the President's Adviser on Science and Technology, all of whom know a lot about and care a lot about this issue we are discussing today.

The recent breakthrough in animal cloning is one that could yield enormous benefits, enabling us to reproduce the most productive strains of crop and livestock, holding out the promise of revolutionary new medical treatments and cures, helping to unlock the greatest secrets of the genetic code. But like the splitting of the atom, this is a discovery that carries burdens as well as benefits.

Science often moves faster than our ability to understand its implications. That is why we have a responsibility to move with caution and care to harness the powerful forces of science and technology so that we can reap the benefit while minimizing the potential danger.

This new discovery raises the troubling prospect that it might someday be possible to clone human beings from our own genetic

FILING OFFICE COPY — UCC FINANCING STATEMENT ADDENDUM (FORM UCC1Ad) (REV. 05/22/02)
GLOBALLY EXTENDED

NAWAPA's approach signifies a change in the organization of the planet as a whole, and its application will set off a pattern of sovereign nation states acting as sovereign nation-states, utilizing the full compass of their own territories for the scientific benefit and increasing power of their citizens. The increase of the infrastructural density and land management techniques will lead to a guaranteed increase in the productive powers of labor, per unit of relevant territory, and in greater rates than ever before, for every continent where the principle is applied.

SCIENTIFIC ADVANCEMENT

Along with its planetary effects as a continental water management system, NAWAPA is a science driver in the true sense of the term:

- The accomplishment of implementing a reservoir management system of its scale, over one continuous, active corridor of scientific coordination, will lead to unpredictable, but guaranteed qualitative effects in overall technological and scientific management.

- The creation of large tunnels, totaling 1000 miles, typify the great advancements to be made in geological mapping, as well as fundamental discoveries in the understanding of life's creation of the earth's crust, and the nature of its useful biogenic ores.

- Creating a permanent presence of civilization in the northern regions will transform our current scientific perspective of the Arctic from isolated research stations in remote and dangerous conditions into an active scientific capability. With the Arctic's unique proximity to the singular electromagnetic conditions of the Polar Regions, the complex of electromagnetic relationships, defining the Earth-Sun magnetic interactions, and determining the evolutionary processes of the biosphere, will finally be integrated into the power of man's understanding, and economy.

- With a restored, non-crisis management approach to the hydrological cycle, new breakthroughs will be made in the biospheric engineering of climate, plant life, ground water, and soils.

- Through the close management of NAWAPA's 240 reservoirs, not only will the continent's production of fish and aquatic protein multiply several fold, but new frontiers will be breached in reservoir science and water treatment methods, mastering the use and engineering of micro-organisms, fish, and plant control.

In accomplishing NAWAPA, man will be poised to begin mastering and making use of the integrated relationships which define life on Earth, and participate in creating its continued evolution, rather than being subject to the whims of nature and local conditions.

NAWAPA

The implementation of NAWAPA means making the bold decision to solve the long term needs of mankind for the next 50 years in the management of water and other presently known and new resources. It means a civilization taking its destiny into its own hands, by managing continental and global characteristics instead of local ones.

Employment & Industry

NAWAPA itself creates directly and indirectly 4 million jobs, plus close to an additional 1.5 million jobs through application of nuclear technologies for the 30,000 MW (mega watt) pumping requirement of the system, for a total of 5.5 million new jobs.

For More, Visit LaRouchePAC.com

Water Management

Due to its specific topographical shape, and ocean air currents, a quarter of all the rain or snow that hits the ground in North America each year falls in a narrow corridor of the continent, with 800 MAFY (million acre feet per year) running directly into the Pacific and Arctic Oceans, unused by the biosphere on land, and wasted. Meanwhile, a large swath of the western half of continent remains dry, and barren.

NAWAPA will remedy this presently inefficient distribution of precipitation: utilizing 20% of this runoff, 160 MAFY, strategically placed dams and tunnels will create a collection system of major new reservoirs and canals, taking advantage of the natural topography of the Rocky Mountain Chain, and effecting a distribution of water to parched lands and strategic water ways. Through 22 MAFY to the Canadian Prairie Provinces, 69 MAFY to US states, and 21 MAFY for Northern Mexico, 86,000 square miles will be irrigated, doubling the current irrigable acreage west of the Mississippi, and replacing the increasingly inefficient and limited sources of well water with a permanent source from gravity flow, relieving agriculture of pumping costs and restoring its productivity.

It is a known fact, that 40% of precipitation over continents (Category A) returns directly as runoff or groundwater discharge to oceans, while 60% percent of precipitation over continents (Category B) re-evaporates, and falls back onto land, recycling itself roughly 2.7 times over land before returning to oceans. By building NAWAPA, the 160 MAFY of normal Category A precipitation will be brought into participation with Category B, being used not once, but multiple times as it recycles as rainfall across the continent, before exiting the system.

Efficiency

The NAWAPA design has the least amount of reservoirs and distribution systems for the greatest effect:
- 3150 individual water resource projects authorized/proposed by Army Corps in 1966:
  - 2.7 billion acre feet of water storage capacity created:
- 369 individual water resource projects proposed in NAWAPA:
  - 4.3 billion acre feet Water storage capacity created:

Hydro-Power

Because of its continental design approach, NAWAPA annually generates 38,000 MW of power for Canada and 30,000 MW for the US, from gravity flow.

Nuclear Renaissance

The 2450 foot Idaho Saw Tooth Lift, necessitating 26,000 MW of power, will require 65, - 400MW modular plants, such as the GE-Hitachi PRISM. The long term settlement of northern regions of Canada and Alaska, will lead to the long awaited application of high temperature nuclear process heat in integrated designed nuplexes (nuclear powered industrial complexes), featuring high temperature(2-3000F) chemical processing industries, water desalination, and electrical power production.

The Canadian/Great Lakes Sea Ways

Barge canals connecting Lake Superior to the Pacific, and Hudson Bay, Georgian Bay, the ore fields of Labrador, and Quebec to the Great Lakes, will lead to an explosion of mining, industrial and research potentials.

Rail Construction

Various Union Pacific, Burlington Northern Santa Fe, and Canadian Pacific routes will need double, and in some cases, triple tracking. 2200 miles of new rail, connecting Prince George and Dawson Creek each to Fairbanks, Alaska must be built. Over 975 miles of double track connecting Fairbanks with Eeyouksit, Chukotka, including a 60-mile Bering Strait connection, will be in order.
